

The Instant Traffic and Weather features of XM Radio are tremendous features in my business. They provide me with the opportunity to safely and efficiently traverse metropolitan areas along the east coast by avoiding congested areas and severe weather.

No "local" radio station has ever provided me with these services. On local radio, I have to wait for commercials, songs, etc. - which take a long time - when instead - I could have gotten off the interstate 10 - 20 minutes earlier and missed an accident, traffic or weather!

Don't stifle the competition of XM radio just because they developed and brought to market a great idea!
